APPLE® POWER MACINTOSH™ 8100/80 AND 8100/80AV

The Power Macintosh 8100/80 and Power Macintosh 8100/80AV deliver the highest performance and speed ever in Macintosh computers. These racehorse computers are designed to meet the speed, expansion, and networking needs of the most demanding Macintosh® power users – from professional publishers to computer-aided design professionals.

Support for GeoPort™ telecommunications (integrating your telephone and your computer), speech-recognition, and text-to-speech capabilities is built into both computers.

- PowerPC™ 601 RISC running at 80 MHz with integrated floating-point unit and 32 K cache; 256 K level 2 cache
- 8 MB or 16 MB of RAM, expandable to 264 MB
- One internal hard disk (250 MB, 500 MB, and 1 GB options available)
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive (reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks)
- Three internal expansion slots, one Apple Desktop Bus™ (ADB) port, AAUI-15 Ethernet connector, high-density display port, two LocalTalk®/GeoPort-compatible DMA serial ports, dual-channel high-speed SCSI interface (supports internal hard disk array), 16 bit stereo sound input and output ports, DB-15 video port; 8100/80AV only: S-video input and output ports, digital audio video connector (DAV)
- DRAM display support; 2 MB of VRAM for second display support, expandable to 4 MB (8100/80 only); 2 MB of VRAM for second display including NTSC or PAL monitors (8100/80AV only)
- Supports one 5.25" device, such as the AppleCD™ 300i Plus CD-ROM drive; accommodates one full-height 3.5" drive and one removable 3.5" device

8100/80 8 MB RAM/250 MB HD

Power Macintosh GeoPort Adapter
FPN: 3601-153 $115

APPLE® POWER MACINTOSH™ 7100/66 AND 7100/66AV

The Power Macintosh 7100/66 and Power Macintosh 7100/66AV are the expandable, mainstream members of the new high-performance line of Macintosh computers based on PowerPC™ chip technology. They're built with the speed, expandability, and networking capabilities that business people require for word processing, desktop publishing, and working with complex spreadsheets and databases. Both computers can also run MS-DOS and Windows applications using SoftWindows software.

Support for GeoPort™ telecommunications (integrating your telephone and your computer), speech-recognition, and text-to-speech capabilities is built into both computers.

- PowerPC 601 RISC running at 66 MHz with integrated floating-point unit and 32 K cache
- 8 MB or 16 MB of RAM, expandable to 136 MB
- One internal hard disk (250 MB and 500 MB options available)
- One built-in Apple SuperDrive 1.4 MB floppy disk drive (compatible with Mac, Windows, DOS, OS/2, and ProDOS disks)
- Three internal expansion slots, one Apple Desktop Bus (ADB) port, AAUI-15 Ethernet connector, high-density display port, two LocalTalk®/GeoPort-compatible DMA serial ports, high-speed SCSI interface, 16 bit stereo sound input and output ports, DB-15 video port; 7100/66AV only: S-video input and output ports, digital audio video connector (DAV)
- DRAM display support; 1 MB of VRAM for second display support, expandable to 2 MB (7100/66 only); 2 MB of VRAM for second display including NTSC or PAL monitors (7100/66AV only)
- Supports one 5.25" device, such as the AppleCD 300i Plus CD-ROM drive

Power Macintosh GeoPort Adapter
FPN: 3601-153 $115

APPLE® POWER MACINTOSH™ 6100/60 AND 6100/60AV

The Power Macintosh 6100/60 and Power Macintosh 6100/60AV are the most affordable members of the new high-performance line of Macintosh computers that use the revolutionary PowerPC chip technology. They deliver the performance that business and education users demand while maintaining the legendary Macintosh ease of use and the ability to run virtually all existing Macintosh applications. Both computers also support MS-DOS and Windows™ applications when using SoftWindows™ software.

Support for GeoPort™ telecommunications (integrating your telephone and your computer), speech-recognition, and text-to-speech capabilities is built into both computers.

- PowerPC™ 601 RISC microprocessor running at 60 MHz with integrated floating-point unit and 32 K cache
- 8 MB or 16 MB of RAM, expandable to 72 MB
- One internal hard disk (160 MB and 250 MB options available)
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive (reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks)
- One Apple Desktop Bus™ (ADB) port, AAUI-15 Ethernet connector, high-density display port, two LocalTalk/GeoPort-compatible DMA serial ports, high-speed SCSI interface, 16 bit stereo sound input and output ports; 6100/60 only: internal expansion slot for processor-direct or 7" NuBus expansion card (requires adapter); 6100/60AV only: DB-15 video port with S-video input and output ports
- DRAM display support, 2 MB of VRAM for second display support (6100/60AV only)
- Supports one 5.25" device, such as the AppleCD 300i Plus CD-ROM drive

6100/60 NuBus Adapter
FPN: 3601-151 GSA: $84

Power Macintosh GeoPort Adapter
FPN: 3601-153 $115

APPLE® POWER MACINTOSH™ UPGRADE OPTIONS

Great news for Macintosh owners who want the new high-speed capabilities of Power Macintosh computers, but don't want to sacrifice their previous investments: the Power Macintosh Upgrade Card and the Power Macintosh Logic Board Upgrades.

You can install the low-cost Power Macintosh Upgrade Card in the processor-direct slot of your Macintosh computer yourself. The card adds the benefits of Power Macintosh technology to your Macintosh, and provides speeds up to four times faster when using programs optimized for Power Macintosh technology. And you can still run all your existing Macintosh applications.

Even greater performance, as well as speech and telephone capabilities, can be yours if you choose the appropriate Power Macintosh Logic Board Upgrade for your Macintosh. By selecting a logic board AV upgrade, you can add support for video input and output. You can also add a CD-ROM drive with the appropriate internal CD-ROM upgrade.

Installation of both the logic board upgrades and logic board AV upgrades must be performed by an authorized Apple technician.

Both the Power Macintosh Upgrade Card and the Power Macintosh Logic Board Upgrade give you the best of both worlds: Power Macintosh capabilities and compatiblity with Macintosh software and peripherals.

Upgrades are available for the following Macintosh CPUs:

Apple Macintosh Quadra® 900/950, 840AV, 800, 700; Apple Macintosh Centris®/Apple Macintosh Quadra® 660AV, 650, 610; Apple Macintosh® IIvx/IIvi; and Apple Performa® 600.

APPLE® MACINTOSH QUADRA® 950

Power, expansion, flexibility – the Apple® Macintosh Quadra® 950 personal computer delivers all three.

- 33 MHz Motorola 68040 with integrated math coprocessor, page memory management unit (PMMU), and 8K memory cache
- 8 or 16 MB of RAM standard, expandable to up to 256 MB
- Hard drive choices up to 1 GB
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive, compatible with Macintosh, MS-DOS, OS/2, and ProDOS® disks
- 1 MB of VRAM standard, upgradable to 2 MB; supports all Apple monochrome and color displays
- Support for up to three additional internal devices, such as a CD-ROM drive or Apple SCSI hard disk drive (several capacities available)
- One Apple Desktop Bus™ (ADB) port, supporting a keyboard, mouse, and other devices daisy-chained through a synchronous serial bus
- Two serial (RS-232/RS-422) ports, SCSI bus interface, video port, five internal NuBus expansion slots, one processor-direct slot provides access to the CPU for highest-possible performance, stereo sound output port, sound input port, dual mono line input ports, AAUI-15 Ethernet connector
- Supports all Apple Desktop Bus™ keyboards

APPLE® MACINTOSH QUADRA® 840AV

The Apple® Macintosh Quadra® 840AV computer incorporates the latest technology advances to make it the highest-performance Macintosh computer ever.

- Motorola 40 MHz 68040 with AT&T 3210 digital signal processor, running at 66 MHz; integrated floating-point unit; page memory management unit (PMMU); and 8 K cache
- 8 or 16 MB of RAM, expandable to 128 MB
- One internal hard disk (230 MB, 500 MB, and 1 GB options available)
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive, compatible with Macintosh, MS-DOS, OS/2, and ProDOS disks
- 1 MB of VRAM standard, expandable to 2 MB; support for all Apple displays
- Built-in AppleTalk networking, file sharing without a dedicated server, on-board Ethernet networking
- Optional internal Apple CD-ROM drive, optional external SCSI hard disk drive
- Three internal NuBus expansion slots, including one with a digital audio video connector (DAV)
- One Apple Desktop Bus™ (ADB) port; AAUI-15 Ethernet connector; two serial (RS-232/RS-422) ports; two S-Video and two composite video ports, one each for input and output; SCSI interface; sound-out port; stereo sound-input port
- Integrated GeoPort™ telecommunications architecture for data, fax, and voice connectivity (requires GeoPort Adapter)

APPLE® MACINTOSH QUADRA® 650

High performance that's easy to expand. The expandable Apple® Macintosh Quadra® 650 computer is equipped to handle the complex tasks that professional users require – from sophisticated spreadsheets to graphics-intensive publishing to database retrieval. The Macintosh Quadra 650 is a good choice if you want a computer that's built for speed, designed for flexibility, and capable of growing with your needs. It has three NuBus slots, a processor-direct slot, and an Ethernet connection, giving you access to a wide range of capabilities. It includes space for an internal 5.25" peripheral – such as a CD-ROM drive or a SyQuest drive – which provides maximum storage capacity. For performance and convenience, the Macintosh Quadra 650 works with all Apple® displays.

- Motorola 68040, running at 33 MHz; 32 bit data bus; integrated math coprocessor; page memory management unit (PMMU); and 8 K cache
- Comes with 8 MB of RAM, expandable to 136 MB
- One internal hard disk (230 MB or 500 MB options available)
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive, compatible with Macintosh, MS-DOS, OS/2, and ProDOS disks
- 512 K of VRAM standard, expandable to 1 MB; supports all Apple displays
- Optional internal CD-ROM drive
- Three internal NuBus expansion slots, 68040 processor-direct slot
- Two Apple Desktop Bus™ (ADB) ports, AAUI-15 Ethernet connector, two serial (RS-232/RS-422) ports, SCSI interface, video port for color and monochrome displays, sound-out port, sound-input port

APPLE® MACINTOSH QUADRA® 660AV

Your personal communications center. The Apple® Macintosh Quadra® 660AV computer allows you to communicate in more ways than ever before. Built-in Apple AudioVision™ Technologies offer unique telecommunications, video, and speech capabilities. The Macintosh Quadra 660AV has an integrated digital signal processor (DSP), which is responsible for processing modem signals, sound, and speech-recognition data so the 68040 processor can take care of its everyday computing tasks without sacrificing speed. And it can respond to voice commands, as well as generate CD-quality stereo sound. When paired with the Apple AudioVision™ 14" display, the Macintosh Quadra 660AV provides a complete multimedia solution.

- Motorola 25 MHz 68040 microprocessor with 55 MHz AT&T 3210 digital signal processor, integrated floating-point unit, page memory management unit (PMMU), and 8 K cache
- 8 MB of RAM, expandable to 68 MB
- 230 MB and 500 MB internal hard disks available
- One built-in Apple SuperDrive® 1.4 MB floppy disk drive, compatible with Macintosh, MS-DOS, OS/2, and ProDOS disks
- 1 MB of VRAM standard, compatible with all Apple monitors
- Optional internal CD-ROM drive
- One internal NuBus expansion slot via NuBus adapter, which includes support for digital audio video (DAV) connector
- One Apple Desktop Bus™ (ADB) port, AAUI-15 Ethernet connector, two serial (RS-232/RS-422) ports, two S-Video and two composite video ports, SCSI interface, sound-out port, stereo sound-input port
- Integrated GeoPort™ telecommunications architecture for data, fax, and voice connectivity

APPLE® MACINTOSH QUADRA® DOS COMPATIBLE

Flexibility! This Apple® Macintosh Quadra® 610 comes standard with an Intel 486SX processor. Because the processors work independently, you can run Macintosh and DOS (or Windows) applications simultaneously – and copy and paste data between the two environments. MS-DOS version 6.2 is installed on the hard drive, along with the Macintosh operating system (system software version 7.1).

You can switch instantly from the Macintosh environment to the DOS environment and vice versa on one display. Or you can add a second display to view both environments simultaneously.

- 68LC040, 25 MHz clock speed, 32 bit data bus AND Intel 486SX, 25 MHz clock speed, 32 bit data bus
- 8 MB of RAM, expandable to 68 MB of RAM by adding single inline memory modules (SIMMs) to two 72 pin slots on the Macintosh logic board; single Macintosh-compatible 72 pin SIMM slot for up to 32 MB of local RAM on DOS Compatibility Card
- Internal 160 MB hard disk
- Built-in Apple SuperDrive 1.4 MB floppy disk drive, which uses high-density floppy disks and reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- 512 K of VRAM, expandable to 1 MB (Macintosh environment); 512 K of RAM for video (DOS environment)
- DOS environment can access either shared memory on the Macintosh logic board (up to 64 MB) or local memory on the DOS Compatibility Card (up to 32 MB)
- Optional internal CD-ROM drive
- Two Apple Desktop Bus (ADB) ports, AAUI-15 Ethernet connector, two serial (RS-232/RS-422) ports, SCSI interface, video port, sound port, PC game port (DOS environment)

Available DOS Compatibility Card for Macintosh upgrades Macintosh Quadra 610 and Macintosh Centris 610 computers to make them DOS- and Windows-compatible.

Macintosh Quadra 610 8/160 DOS Compatible
FPN: 1166-502 GSA: $1,412

DOS Compatible Card for Macintosh Quadra/Macintosh Centris 610
FPN: 1245-800 GSA: $354

Apple Extended Keyboard II
FPN: 1145-002 GSA: $146

APPLE® MACINTOSH QUADRA® 605

The ideal entry-level business system. The Apple® Macintosh Quadra® 605 computer is the most affordable high-performance desktop system, making it an ideal multi-purpose personal computer for business and professional users. Yet the Macintosh Quadra 605 brings the cost of high performance down to almost any budget. And the new slim design saves desk space.

Ships w/all of these software packages

- Claris Works (Integrated word processing, spreadsheet, charting, outlining, paint tools, communications and more)
- Quicken – Personal and small business finance software
- Astound – Software for multimedia presentations
- FileDuo – Automatic personal backup utility
- Full Contact – Information management software program's daily, weekly, and monthly calander
- Common Ground – Share documents electronically
- Working Watermaker – Great printing utility
- American Heritage Dictionary – Reference and writing tool

The Macintosh Quadra 605 has a processor-direct slot that lets you add the capabilities you need, such as Ethernet networking (through the Apple Ethernet LC Card). It features built-in support for all Apple displays.

- 25 MHz 680LC40 microprocessor
- 4 or 8 MB of RAM on board, expandable to 36 MB
- One internal 160 MB or 250 MB HD
- One built-in Apple SuperDrive 1.4 MB floppy disk drive, compatible with Macintosh, MS-DOS, OS/2, and ProDOS disks
- 512 K of VRAM standard, expandable to 1 MB; works with all Apple displays
- Expansion slot supports most Apple Macintosh® LC II, LC III, and LC 520 expansion cards
- Apple Desktop Bus™ (ADB) port, SCSI interface, two serial (RS-232/RS-422) ports, video port, sound-output port, sound-input port

APPLE POWERBOOK® 540C

The Apple PowerBook 540c is Apple's top-of-the-line color PowerBook computer. It provides a host of innovative advances in technology, design, performance, and expandability—making it the ideal system for power users on the go.

Designed for easy expansion, the PowerBook 540c is upgradable to PowerPC chip technology and offers the optional PCMCIA Expansion Module. And to help make you more productive right away, the PowerBook 540c comes with the PowerBook Mobility Bundle, integrated software that lets you access network resources remotely, synchronize files, optimize battery power, work with Windows and DOS files, and more.

Offers a processor-direct slot (PDS) with an optional PCMCIA expansion module, which allows the instant expansion with Type II or Type III PCMCIA expansion cards.

- 66/33-MHz Motorola 68LC040 with integral memory management unit (MMU)
- 4 MB of RAM, expandable to 36 MB
- Built-in Apple SuperDrive 1.4 MB floppy disk drive, compatible with Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- Internal 320 MB hard disk drive
- 9.5" (diagonal), backlit, active-matrix color display up to 640 x 480 pixels
- Dual nickel-metal-hydride PowerBook Intelligent Batteries Energy conservation: Sleeps on close
- One Apple Desktop Bus™ (ADB) port, one serial/LocalTalk port, one high-speed Ethernet port, one SCSI port, one power adapter port, one 90-pin PDS, one slot for optional internal modem, one slot for security, stereo sound input/output, one RAM slot
- Video-out port with standard DB-15 connector provided
- Solid-state trackpad provides precise cursor control

They Said It Couldn't Be Done.

Not long ago sharing files between two or more computers was considered a technological breakthrough. Opening the same file on both DOS and Apple® Macintosh® systems? No way. And running DOS or Windows on a Macintosh? Forget it.

At Falcon™ we provide what was once considered the unthinkable everyday. And we do it with products like the Apple Power Macintosh™, Apple® Computer's most powerful CPU ever. Incredibly fast and extremely affordable, Power Macintosh is totally compatible with virtually every other computer in the world. ncluding the hundreds of DOS, Windows, and UNIX systems in stock at our warehouse.

In the same way Power Macintosh makes it easy to transparently run all kinds of software, Falcon makes it easy for you to purchase computer hardware and software – regardless of your computer platform. One phone call to Falcon connects you to the best brands and the best prices.

Here's our business: we bridge the gap between the hundreds of computer choices available to you today and finding an easy way to choose the one that's right for you.

That's what makes Falcon your best source for the best brands, the best prices, and more than 20,000 multi-platform hardware, software, and networking products.

We're open Mon. – Fri.: 7:30 a.m. – 7:30 p.m. Eastern Time. Reach us at the number below, by fax at 301-386-3583, or via the Internet at sales@falconmicro.com. Falcon accepts VISA, I.M.P.A.C. VISA, and MasterCard.

Presenting two of Washington's most fashionable cuts.

All Bernoulli® products up to

50% OFF

Let's cut to the chase: Iomega has just trimmed the price of Bernoulli® drives, some by as much as 50 percent.

It's a new look at Iomega. And it's permanent.

That means you can take advantage of the unmatched security, ruggedness—and now cost-effectiveness—of Bernoulli drives that can be used with PCs, Macs and workstations.

So call Falcon Microsystems at **1-800-795-BEST** for full details about the GSA pricing listed below. And see why Bernoulli is a cut above the rest.

APPLE® MACINTOSH® POWERBOOK DUO™ 280C

Users looking for the leading full-featured color subnotebook computer need look no further. The Apple PowerBook Duo™ 280c is the only subnotebook that supports 16-bit color. It also features exceptional performance and plenty of room for expansion – all in a package that fits easily into a briefcase.

For users with an eye on the future, the PowerBook Duo 280c is also upgradable to PowerPC™ technology.

The PowerBook Duo 280c includes an integrated full-page-width, backlit, active-matrix display that offers two modes – 640 x 480 pixels with 256 colors, and 640 x 400 pixels with up to thousands of colors. And if users want to take advantage of the features of a desktop system, they can use a docking product such as the PowerBook Duo Dock II or PowerBook MiniDock to connect to large displays, servers, printers, and network services.

- 66/33-MHz Motorola 68LC040 with integral memory management unit (MMU)
- 4 MB of RAM, expandable to 40 MB
- Internal 320 MB hard disk drive
- Optional external Apple SuperDrive® 1.4 MB floppy disk drive, which uses high-density floppy disks and reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- 8.4" (diagonal), backlit, active-matrix color display up to 640 x 480 pixels
- Nickel-metal-hydride High Capacity Type II battery provides two to four hours of use before recharge
- Power adapter port; 152-pin processor-direct slot (PDS) connector for connecting PowerBook Duo Dock, PowerBook Duo MiniDock, PowerBook Floppy Adapter, or other third-party expansion devices; serial (RS-422) port; port for optional internal modem

APPLE® MACINTOSH® POWERBOOK DUO™ 280

Users looking for the leading full-featured subnotebook computer need look no further. The Apple PowerBook Duo™ 280 offers exceptional performance, an active-matrix screen, and plenty of room for expansion – features normally found only on much larger, heavier systems – all in a package that weighs only slightly more than 4 pounds.

Featuring an advanced 66/33 MHz 68LC040 processor, the PowerBook Duo 280 brings a new level of power and performance to mobile computing. It comes with a large hard disk, and its RAM can be easily expanded to up to 40 MB. For users with an eye on the future, the PowerBook Duo 280 is also upgradable to PowerPC technology.

In short, the PowerBook Duo system lets you decide which capabilities you want, letting you invest in exactly the setup that suits your needs.

- 66/33 MHz Motorola 68LC040 with integral memory management unit (MMU)
- 4 MB of RAM, expandable to 40 MB
- Internal 240 MB hard disk drive
- Optional external Apple SuperDrive 1.4 MB floppy disk drive, which uses high-density floppy disks and reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- 9" (diagonal), backlit, active-matrix grayscale display; 640 x 400 resolution
- Nickel-metal-hydride High Capacity Type II battery provides two to four hours of use before recharge
- 152-pin processor-direct slot (PDS) connector for connecting PowerBook Duo Dock; PowerBook Duo MiniDock, PowerBook Floppy Adapter, or other third-party expansion devices; serial (RS-422) port; port for optional internal modem; power adapter port

APPLE® MACINTOSH® POWERBOOK DUO™ DOCK

The Apple PowerBook Duo™ Dock gives your PowerBook Duo expansion capabilities that let you turn it into a full Macintosh desktop system.

PowerLatch™ docking technology provides easy, reliable connections between the two, so you have instant access to such desktop resources as a large color display, full-size keyboard, mouse, printers, and network resources.

The PowerBook Duo Dock supports Apple displays and has two full-size NuBus slots. The 1.4 MB Apple SuperDrive lets you read, write, and format Macintosh, Windows, and MS-DOS floppy disks. There's even room for an additional hard disk.

The PowerBook Duo Dock II can support even larger monitors, up to 20 inches. It also includes a high-speed Ethernet port, 68882 math co-processor and 32 K memory cache.

And, when you're away from your office, you can use the portable Apple Macintosh Duo™ MiniDock to work with external displays, CD-ROM drives, and other peripherals.

The PowerBook Duo Dock II Upgrade will give your existing PowerBook Duo Dock all of the capabilities of the PowerBook Duo Dock II.

PowerBook Duo Dock

- PowerLatch docking technology
- Internal 1.4 MB Apple SuperDrive
- Built-in video support for 256 colors
- Two NuBus expansion slots
- Ten built-in ports, including a SCSI port; pass-through port for modem in PowerBook Duo; security key for locking PowerBook Duo and slot for security cable

PowerBook Duo Dock II adds:

- 68882 coprocessor and 32 K RAM cache; 1 MB of VRAM; built-in support for high-speed Ethernet

PowerBook Duo MiniDock

- Small size and weight for easy portability; PowerLatch docking technology; built-in video support for 256 colors; nine built-in ports; port for connecting external floppy drive

NEWTON® MESSAGEPAD® 110

The Apple Newton® MessagePad™ 110 personal digital assistant can help you manage information, stay in touch via fax, electronic mail, and paging, and exchange information with your computer.

It's the second member of the Newton family, and has more than three times the memory space and twice the battery life of the original Newton MessagePad.

It can help you stay in touch and communicate more effectively. You can send faxes and receive pages and messages. You're able to tap into on-line services or electronic mail. You can even exchange business cards via built-in infrared technology.

The MessagePad 110 can help you share and synchronize information with your Windows-based or Macintosh computer. It can help you organize ideas, take notes, make sketches, format and print letters.

Additionally, you can expand its capabilities, with new software titles that help you keep track of your time, find your way around unfamiliar cities, and even deliver better-organized speeches.

The Newton MessagePad 110 has powerful handwriting-recognition capabilities for both printed and cursive writing. So it can transform your handwriting into text letter-by-letter, or word-by-word. It can also leave your notes handwritten should you prefer to defer recognition until later.

As time goes by, it learns about you, your handwriting, and the way you work, helping you get more done. It comes with a built-in-notepad, to-do list, datebook and name file to get you started. When combined with software titles offering new capabilities, the Newton MessagePad is likely to become your most treasured possession.

FEATURES:

Built-in Applications

- Let you capture, organize, and communicate business and personal information
- Allow free-form notetaking, mixing handwriting, printed text, and graphics
- Turn printed or cursive handwriting into typed text or leave it handwritten
- Recognize writing letter-by-letter or word-by-word
- Update daily to-do lists, help assign priority to tasks
- Let you create name files with a business-card look for hundreds of people
- Help you plan monthly, weekly, and daily calendars
- Include information and productivity tools (such as time-zone maps, calculator, and currency-exchange formulas)

Communications Capabilities

- Send notes or messages, schedule appointments, or exchange business cards with other nearby Newton users via built-in, infrared beaming technology
- Print formatted letters and notes to serial and parallel printers
- Send faxes anywhere with an optional fax modem
- Receive and store wireless paging messages with the optional Newton Messaging Card
- Share your Newton information and keep files synchronized and updated with personal computers running Microsoft Windows or with Macintosh computers (requires optional Newton Connection Kit)
- Tap into electronic mail and on-line services with an optional fax modem

Intelligent Assistance

- Knows how you work and actively assists you in completing tasks
- Assists you in making phone calls, faxing, finding information, sending electronic mail, printing, scheduling meetings, and completing to-do lists

APPLE 14" DISPLAYS

Apple® Color Plus 14" Display

The most affordable RGB color monitor from Apple® Computer. The new Apple® Color Plus 14" display features high-quality resolution, ergonomic design, ease of use, and compatiblity with all the modular Apple® Macintosh® computers, as well as most Apple PowerBook® computers.

FPN: 1355-029 GSA: $269

Apple® Macintosh® Color Display

The low-cost, high-quality color display. Ergonomic design, color and grayscale, 14" triniton tube, and high refresh rate for flicker-free operation. 640 x 480 resolution displays up to 16.7 million colors. Built-in tilt-and-swivel base.

FPN: 1355-024 GSA: $339

Apple® AudioVision™ 14" Display with Adapter

Combines superb color graphics with a revolutionary new sound system, so you can work with multimedia applications. Integrates CD-quality stereo speakers, microphone, and high-contrast display into a single, sleek package. 640 x 480 pixels; 70 DPI.

FPN: 1355-604 GSA: $598

APPLE 17" DISPLAY

Apple Multiple Scan 17 Display

The Apple Multiple Scan 17 Display is a high-quality monitor that's perfect for business tasks such as creating presentations, word processing, and working with spreadsheets. It features the state-of-the-art Trinitron screen, offers a host of advanced features, and even comes with a PC video adapter, so you can easily use it with your IBM PC-compatible computer running MS-DOS or Windows as well as with your Macintosh computers.

Because the Multiple Scan 17 Display uses multiple-scan technology, you can choose between several resolutions that give you the flexibility to adjust your display to best suit the application in which you are working. It offers three different viewing modes: page-layout mode, which lets you view two pages simultaneously and is good for spreadsheets; publishing mode, which provides actual-size resolution for word processing or everyday work; and presentation mode, which lets the computer show more colors, making it great for presentations and easier to work with images.

Yet even with all of these features, the Apple Multiple Scan 17 Display remains affordable – making it the perfect choice for business professionals whose work requires a high-quality, flexible, color viewing solution.

FPN: 1355-057 GSA: $966

Purchase Apple Computer products at reseller location only.

APPLE 20" DISPLAY

Apple Multiple Scan 20 Display

The Apple Multiple Scan 20 Display provides publishing professionals with the ideal solution for all of their color graphic display needs. It offers high-quality, two-page viewing, and it comes with a PC video adapter, so you can easily use it with your MS-DOS- and Windows-based systems and with any of your Macintosh computers.

Today, two-page viewing is a must for graphics and publishing professionals from graphic designers to photo retouchers to journalists. The Apple Multiple Scan 20 provides a complete, high-quality Apple solution to meet these needs, making it easy to set up a system that will allow you to get the job done – whether it's designing a newsletter or producing a newspaper.

With its state-of-the-art Sony Trinitron picture tube – the technology of choice for demanding graphics professionals – the Apple Multiple Scan 20 Display provides crisp, bright color images. And for maximum flexibility, the Apple Multiple Scan 20 Display will display a wide range of resolutions. With the included software, you can enlarge images on the screen and increase the resolution for viewing full two-page layouts dynamically. And you don't even have to quit applications or restart your Macintosh. It supports all the standard Macintosh resolutions from 640 x 480 to 1,152 x 870, plus higher resolutions – up to 1,280 x 1,024 with appropriate third-party display cards for Macintosh computers or IBM PC compatibles.

APPLE DIGITAL CAMERA

Apple QuickTake™ 100 Digital Camera

There's no faster or easier way to bring the world directly into your computer than with the Apple QuickTake 100 digital camera for Macintosh or Windows. Pick it up, and you'll start taking 24-bit, high-quality color pictures instantly.

This affordable digital camera needs no film. Use it like your favorite hand-held camera to shoot 32 standard-resolution images or 8 high-resolution images at a time – all in high-quality, 24-bit color. You can change from standard to high resolution at will. And you can load all 32 pictures from your QuickTake 100 into your Mac® or PC in a single step – where they'll appear on your display in more than 16 million colors.

Since the QuickTake 100 digital camera weighs just a pound with batteries installed, you can take it anywhere. The built-in automatic flash gives you perfect pictures indoors or out. Easy-reading icons on its handy display panel monitor flash and battery status, the number of pictures taken and remaining, selected resolution, self-timer settings, and more.

The QuickTake 100. It's a great way to get your start in pictures.

CAROL G.
INSIDE SALES

"All he left me was this guitar, a hound dog, and a broken heart."

Why is it that some software companies remind you of country music? Is it because their love lies elsewhere?

Not so at WordPerfect® New WordPerfect 3.0 says we're completely faithful to the Macintosh® platform. In fact, when Apple® introduced the Power Macintosh, we were there—running native. Our competition wasn't.

We're also committed to new features. Macintosh features. Like customizable button and ruler bars that let your users do everything from change layouts and styles, to create tables at the click of a mouse. Since it's easier to use, it's also easier to teach. And WordPerfect has excellent cross-platform compatibility.

We love the Mac. And we'd never leave it. Besides, our pickup truck is busted.

Accelerated for Power Macintosh

We were first to support QuickTime. First with AppleScript. WorldScript. PowerTalk. And now the Power Macintosh. Are you sensing a theme here?

What other computers will run tomorrow,

*Power Macintosh 6100/60**

*Power Macintosh 7100/66**

*Power Macintosh 8100/80**

Power Macintosh runs today.

Introducing Power Macintosh: the first Macintosh computers with Power PC

PowerPC™ technology is changing the face of personal computing. And so are Power Macintosh™ computers—the first members of the Apple® Macintosh® family to include PowerPC microprocessors.

Power Macintosh computers deliver the raw processing speed once reserved for network servers and high-end workstations—making them ideally suited for graphics, Apple AV technologies, and computation-intensive applications. They also work with System 7™ software, so Macintosh users can get going right away with no additional training.

With Power Macintosh you can run your current applications without changing a thing. Just double-click and go. And with SoftWindows software, you can run DOS and Windows applications, as well.†

But that's just the beginning. There are dozens of Power Macintosh applications designed to take full advantage of the RISC technology built into every PowerPC chip—and developers are writing still more.

And right now you can choose from three Power Macintosh computers—the affordably priced Power Macintosh 6100/60, the mainstream 7100/66, or the 8100/80, our most powerful Macintosh ever.

Of course, the PowerPC advantage won't be limited to just Power Macintosh computers. Apple is bringing out PowerPC upgrades for many of its most popular Macintosh computers.‡

So stop in today and see the future of computing. Power Macintosh. The future is here.
